

Analog/Mixed-Signal Products

Designer's Master Selection Guide

August 2002

IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, modifications, enhancements, improvements, and other changes to its products and services at any time and to discontinue any product or service without notice. Customers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All products are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its hardware products to the specifications applicable at the time of sale in accordance with TI's standard warranty. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by government requirements, testing of all parameters of each product is not necessarily performed.

TI assumes no liability for applications assistance or customer product design. Customers are responsible for their products and applications using TI components. To minimize the risks associated with customer products and applications, customers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any TI patent right, copyright, mask work right, or other TI intellectual property right relating to any combination, machine, or process in which TI products or services are used. Information published by TI regarding third-party products or services does not constitute a license from TI to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

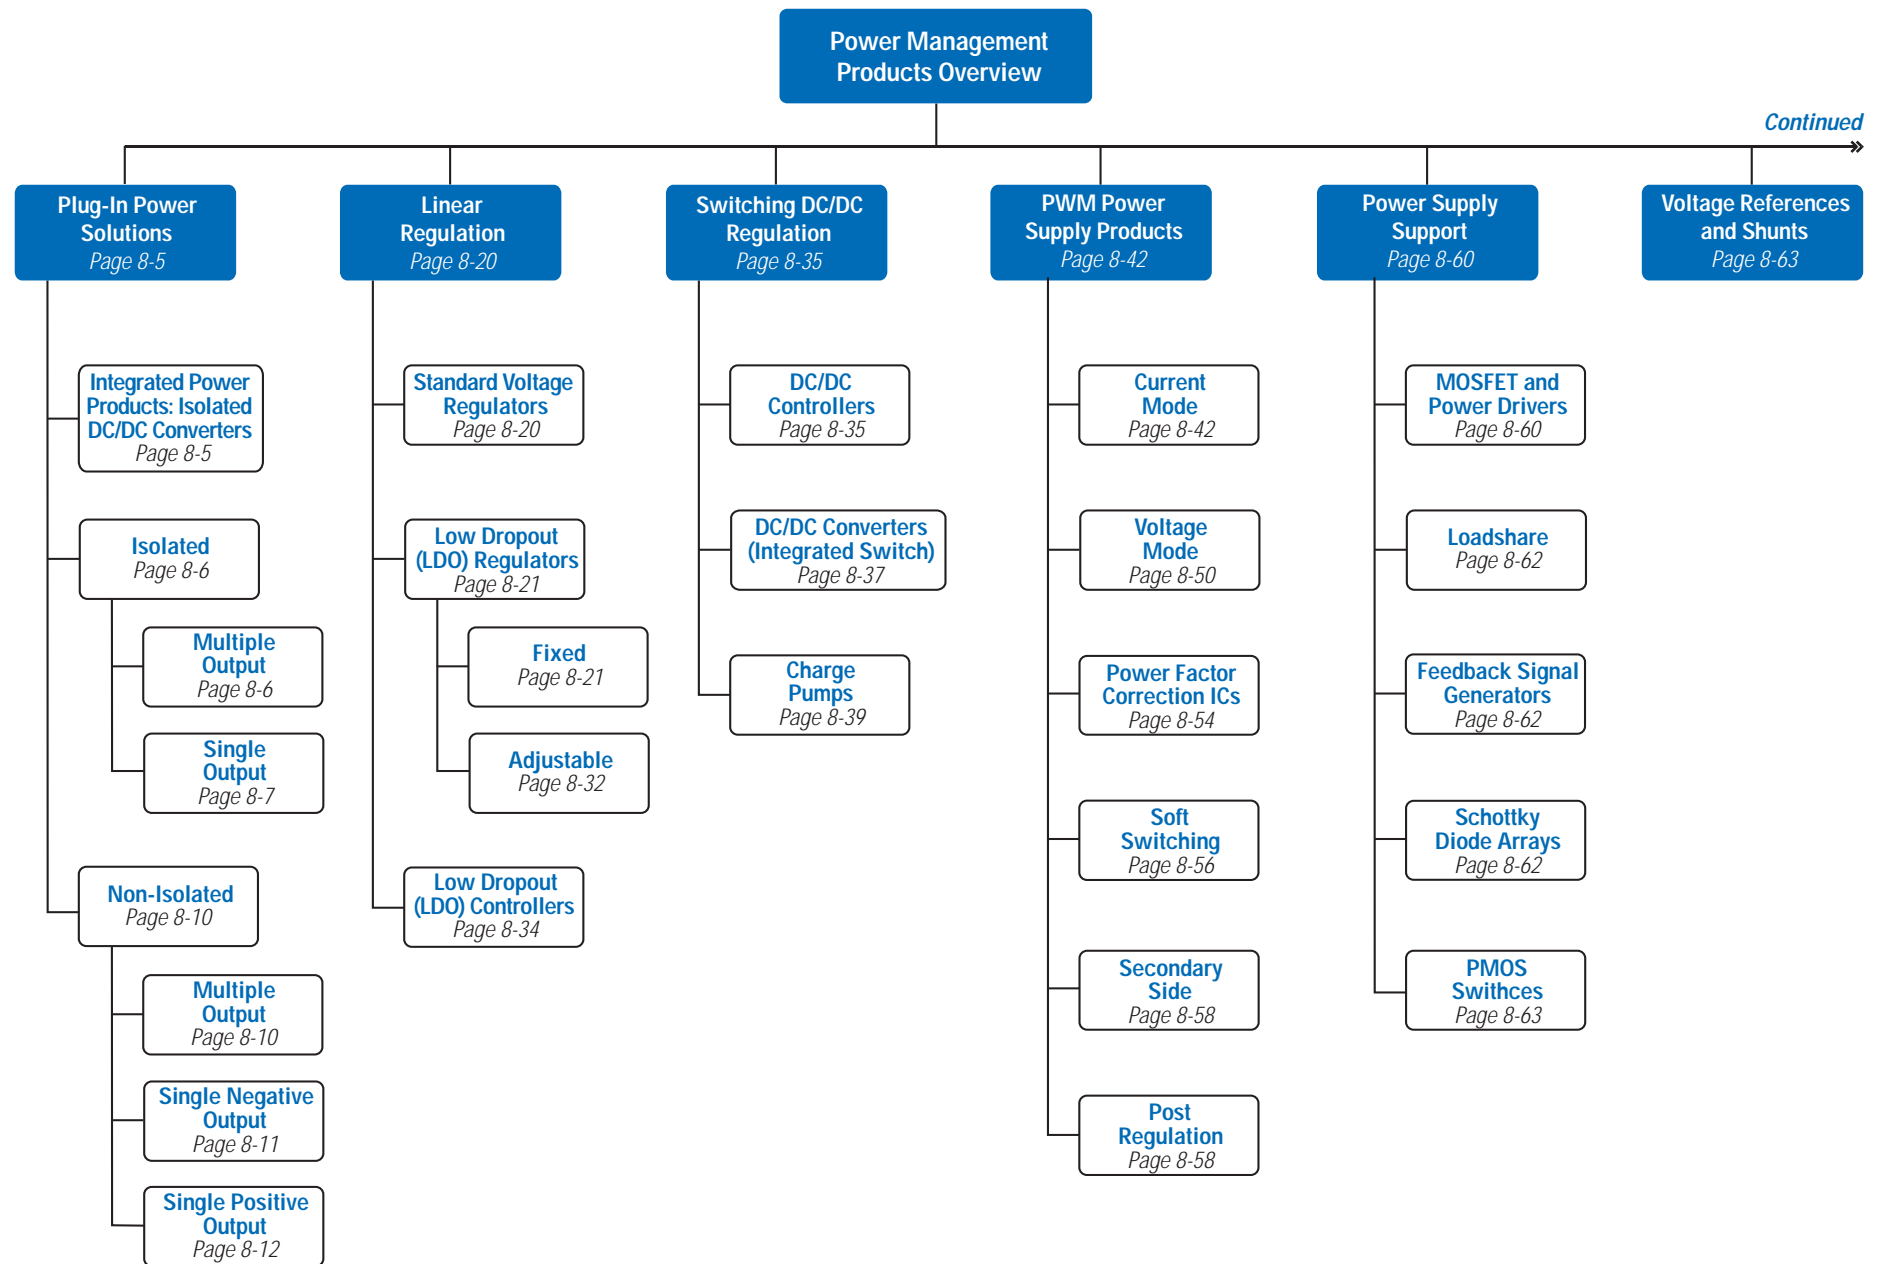

Reproduction of information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. Reproduction of this information with alteration is an unfair and deceptive business practice. TI is not responsible or liable for such altered documentation.

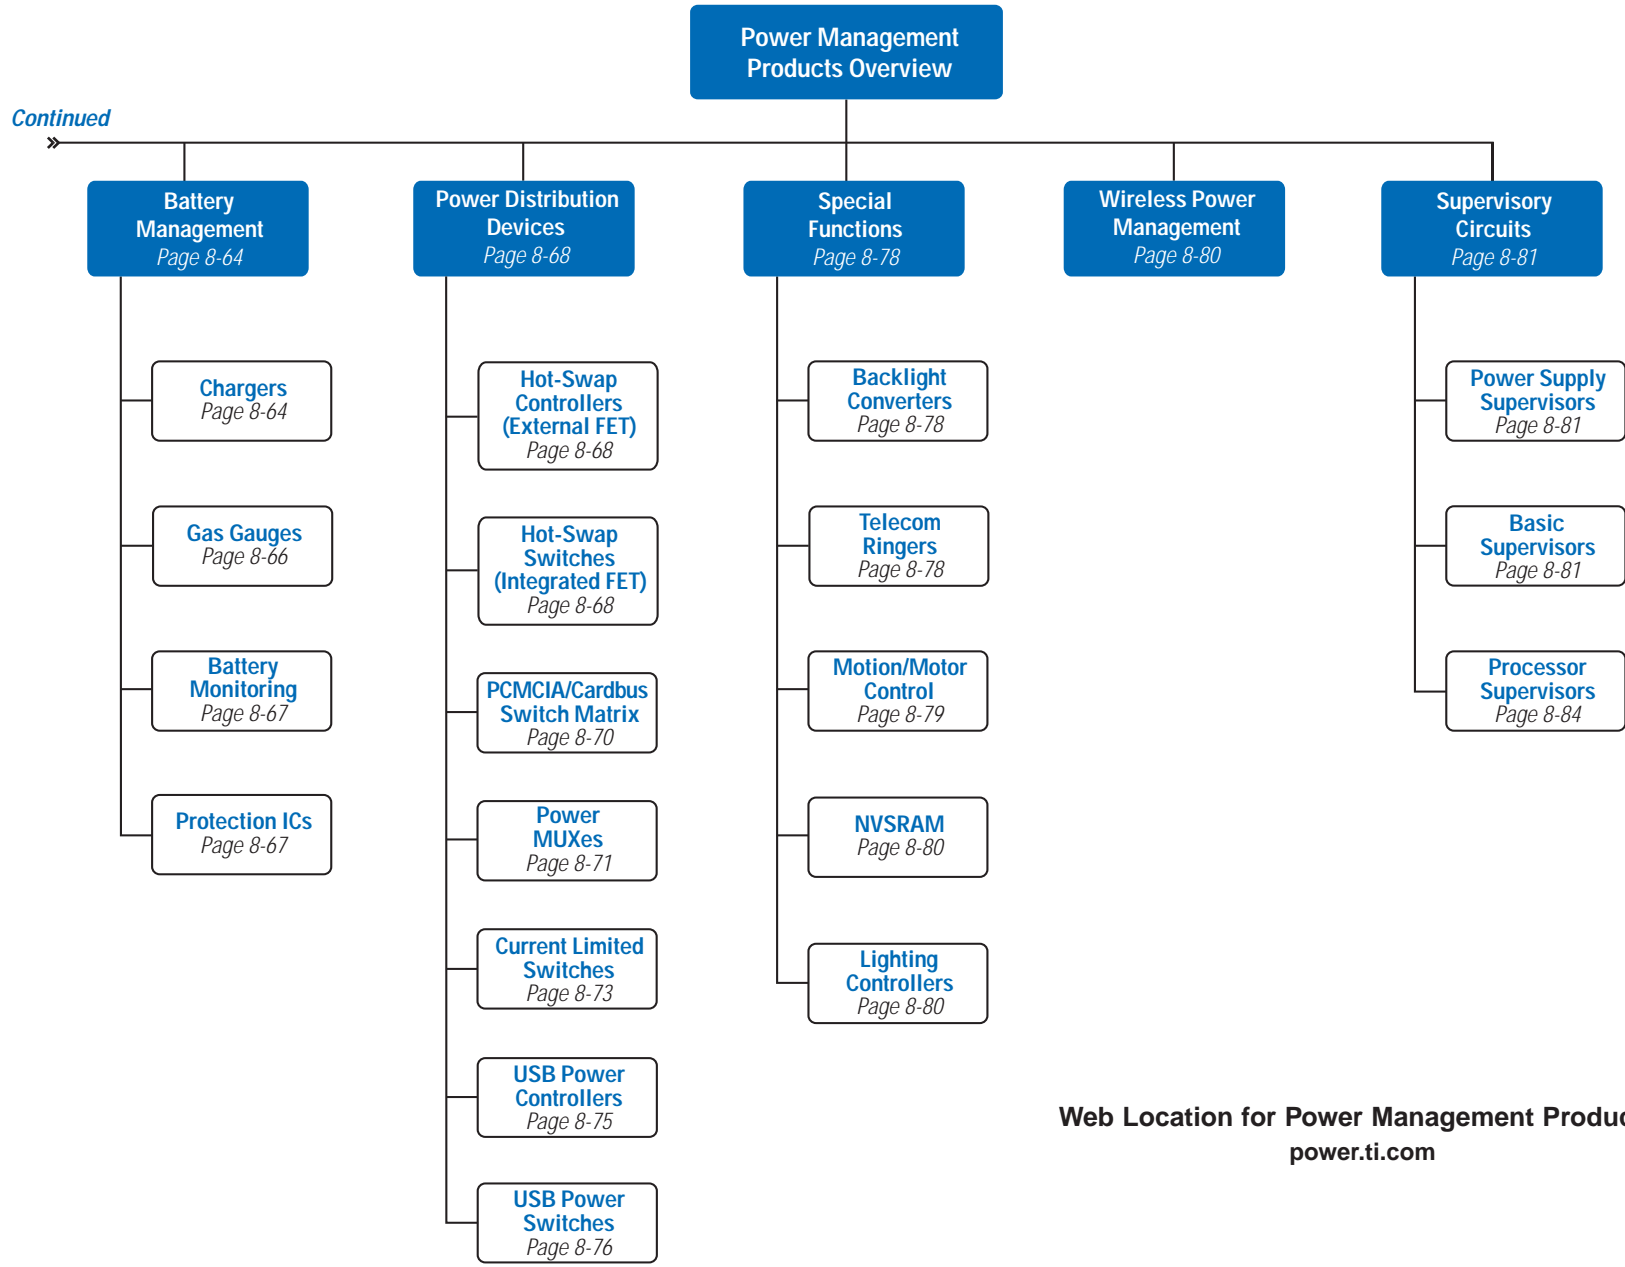

Resale of TI products or services with statements different from or beyond the parameters stated by TI for that product or service voids all express and any implied warranties for the associated TI product or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.

For military qualified products, refer to:
www.ti.com/sc/docs/products/military/mix_sig/index.htm

The Texas Instruments (TI) family of power management devices offers one of the most complete, cost-effective power management portfolios in the industry. In addition to the product portfolio, TI also provides customers with one of the most comprehensive “solution portfolios” for ICs, EVMs, application notes and power modules.

TI is always in the process of expanding its power management portfolio with the introduction of new leading-edge power solutions. With the acquisition of both Unitrode™/Benchmarq™ and Power Trends™, our customers can now fill the majority, if not all, of their power management needs from Texas Instruments. From a simple low-dropout regulator to a complete plug-in module, TI has the solution. This section outlines the various product spaces within TI's powerful line-up of power management solutions.

For technical assistance, requesting datasheets or samples, see Contact Information on the last page of this book.

Two other resources for product information are:

- 1) the *Analog and Mixed-Signal* webpage at analog.ti.com
- 2) the Designer's Master Selection Guide CD-ROM (SLYC005G). Complete and return the attached business reply card to order.

■ Product Highlights

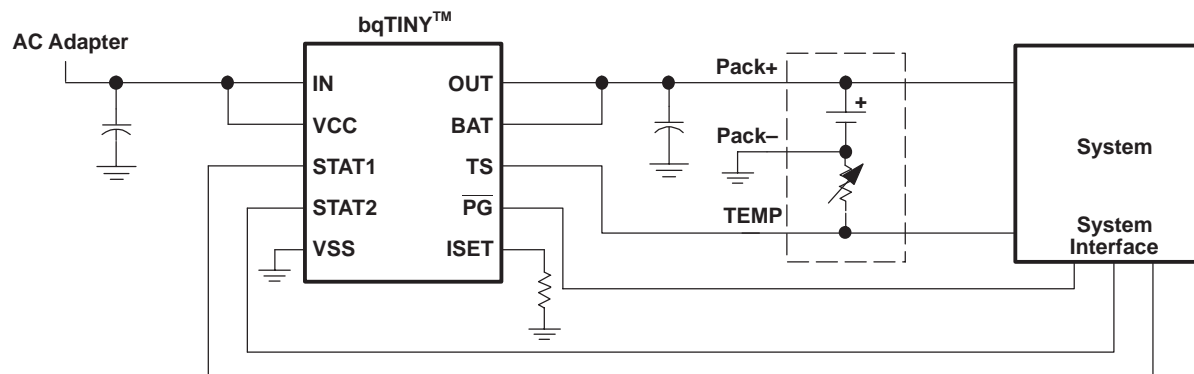

bq2401x “bqTINY™” Fully Integrated 1-cell Li-Ion Charger with 1-A FET and Current Sense in 3 x 3-mm MLP—Product Preview

The bq2401x series offers highly integrated linear Li-Ion charge management devices for single-cell Li-Ion and Li-Polymer applications. They integrate 1.0-A charge FET, reverse-blocking Schottky diode and current sense along with other battery-management features. They require a minimal set of external components and come in the 3 x 3-mm, MLP-10 package for smallest implementations.

Features

- Integrated Power FET, Current Sensor and Reverse-Blocking Schottky Diode
- Charges Single-Cell Li-Ion or Li-Pol Battery Packs with up to 1-A Charge Current and Low Dropout
- 3 x 3-mm, MLP-10 Package
- Input Voltage 3 to 18 V
- Power Good (AC Adapter Present) Status Output
- Charge-Status Outputs for LED or Host Processor Interface to Indicate Charge in Progress, Charge Completion, and Fault
- Current and Voltage Regulation Control
- Charge Termination by Minimum Current and Time
- Precharge Conditioning With Safety Timer
- Optional Temperature Monitoring Battery
- Automatic Low-Power Sleep Mode

Typical Block Diagram

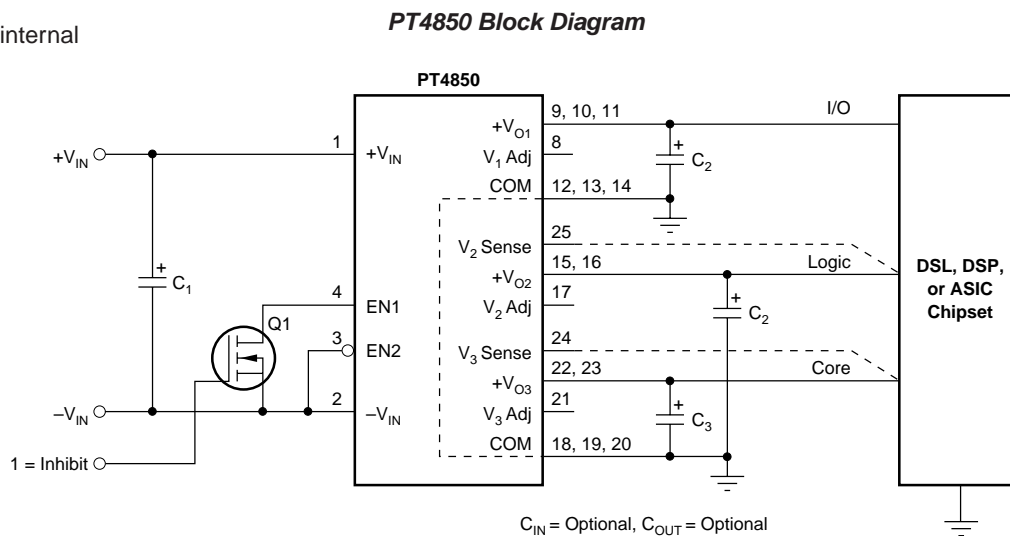

■ Product Highlights (Continued)

For Plug-In Power, Use the PT4850—Product Preview

Industry's first 75-W power module with three low-voltage outputs and internal sequencing, all in a package size smaller than a half-brick.

Features

- Sequenced, 3 Independently Regulated Outputs
- 48-V Input (36-V to 75-V Range)
- Combined 25-A Output
- 85% Typical Efficiency
- -40°C to +85°C Operating Temperature Range
- Over-Current, Over-Voltage, Over-Temperature, Under-Voltage Lockout Protection
- Dual Logic On/Off Control

TPS6220x 97% Efficient 300-mA Step-Down DC/DC Converter in SOT-23—Product Preview

The TPS6220x series is a step-down DC/DC converter with integrated FETs in a SOT-23 package. It delivers over 300 mA of output current with output voltages as low as 0.7 V. The power conversion efficiency reaches up to 97%.

Features

- Up to 97% Efficiency
- Up to 300-mA Output Current
- 5-Pin SOT-23 Package
- 15- μ A Quiescent Current
- 2.5-V to 6.0-V Input Voltage Range
- Adjustable Output Voltage from 0.7 V to V_{IN}
- 1-MHz Fixed-Frequency PWM Operation
- 100% Duty Cycle Low-Dropout Operation

■ Special Functions—NVS RAM

Device Name	Supply Voltage (V)	Memory Density (Kb)	Number of SRAM Banks Controlled	Reset Output	Package	Price*	Description
BQ4010	5	64			DIP Module	7.75	8Kx8 Nonvolatile SRAM, 5% Voltage Tolerance
BQ4010Y	5	64			DIP Module	7.75	8Kx8 Nonvolatile SRAM, 10% Voltage Tolerance
BQ4011	5	256			DIP Module	8.85	32Kx8 Nonvolatile SRAM, 5% Voltage Tolerance
BQ4011Y	5	256			DIP Module	8.85	32Kx8 Nonvolatile SRAM, 10% Voltage Tolerance
BQ4013	5	1024			DIP Module	10.66	128Kx8 Nonvolatile SRAM, 5% Voltage Tolerance
BQ4013Y	5	1024			DIP Module	10.66	128Kx8 Nonvolatile SRAM, 10% Voltage Tolerance
BQ4014	5	2048			DIP Module	29.01	256Kx8 Nonvolatile SRAM, 5% Voltage Tolerance
BQ4014Y	5	2048			DIP Module	29.01	256Kx8 Nonvolatile SRAM, 10% Voltage Tolerance
BQ4015	5	4096			DIP Module	31.01	512Kx8 Nonvolatile SRAM, 5% Voltage Tolerance
BQ4015Y	5	4096			DIP Module	31.01	512Kx8 Nonvolatile SRAM, 10% Voltage Tolerance
BQ4016	5	8192			DIP Module	36.50	1024Kx8 Nonvolatile SRAM, 5% Voltage Tolerance
BQ4016Y	5	8192			DIP Module	36.50	1024Kx8 Nonvolatile SRAM, 10% Voltage Tolerance
BQ4017	5	16384			DIP Module	65.50	2048Kx8 Nonvolatile SRAM, 5% Voltage Tolerance
BQ4017Y	5	16384			DIP Module	120.10	2048Kx8 Nonvolatile SRAM, 10% Voltage Tolerance
BQ2201	5		1	No	PDIP,SOIC	1.75	SRAM Nonvolatile Controller IC for 1 SRAM Bank
BQ2204A	5		4	No	PDIP,SOIC	2.16	SRAM Nonvolatile Controller IC for 4 SRAM Banks

■ Special Functions—Lighting Controllers

Device Name	Control Topology	V _{IN} Range (typ) (V)	V _{ref} Tol (%)	Open Lamp Detect	Soft Start	External Sync	Frequency (max) (kHz)	Lamp Intensity Control	Package	Price*	Description
UCC2305	Boost, Flyback	5 to 18	2	Yes	Yes	Yes	200	Yes	PDIP,SOIC	5.60	HID Lamp Controller
UCC3305	Boost, Flyback	5 to 18	2	Yes	Yes	Yes	200	Yes	PDIP,SOIC	4.66	HID Lamp Controller

■ Wireless Power Management

Device Name	Primary Battery Charger	Backup Battery Charger	Number of Integrated LDO Regulators	System Reset Controller	Real-Time Clock	Pin Count	V _{CC}		Package	Price*	Description
							(min) (V)	(max) (V)			
TPS9103						20	2.7	5.5	TSSOP	1.79	Integrated GaAs Power Supply And Protection
TPS9104			3	No	Yes	48	3	10	LQFP	3.76	Integrated Wireless Comm Power Supply And Audio
TPS9125						14	2.7	3.3	TSSOP	1.00	SIM Supply and Level Shifter
TWL2214CA	Yes	No	6	No	Yes	48			TQFP	4.15	Power Supply Management IC and Li-Ion Battery Charge Control

*Budgetary price per unit in U.S. dollars, lots of 1,000+

Evaluation Modules and Development Tools

To ease and speed the design process, TI offers evaluation modules (EVMs) for many analog and mixed-signal products.

EVMs contain a fully-assembled evaluation board, data sheet and user's guide. Some modules may include applications notes, software, cables and connectors.

To determine whether a product has an EVM, simply access the "product folder" for the part in question at <http://analog.ti.com> by entering the part number of the product in the "Search TI" field. The "product folder" will appear in the search results. Next, click on the "product folder" then click on "Development Tools" (upper right-hand section of the page) to determine EVM availability.

To place an order for an EVM or if you do not have Internet access, contact TI's Product Information Center (PIC) at 1-800-477-8924, ext. 5800 in North America, or go to: <http://support.ti.com> to locate the Product Information Center nearest you. EVMs may also be ordered through your local TI distributor. See <http://focus.ti.com/docs/general/distributor.jhtml> for distributor listings.
